## INTRODUCTION

Selected Financial Data is prepared annually from information contained in the Annual Financial Reports submitted by each of the 24 local education agencies (LEAs) in Maryland. These reports, authorized under the Public School Laws of Maryland, Section 2-205, Section 5-109 and Bylaw 13A.02.01.03, dictate a uniform format for reporting LEA finances to the Maryland State Department of Education. A manual entitled the Financial Reporting Manual for Maryland Public Schools was developed to further define the reporting requirements as contained within the law and to enable a collection of financial data which will conform to federal and state reporting requirements. Revised periodically to incorporate these changes, the latest revision was in 1983.

## FINANCIAL REPORTING, IN BRIEF

LEAs are legal entities which exist to operate schools or contract for educational services. In Maryland, these school units are coterminous with the boundary of the political subdivision; i.e., the 23 county governments and the Baltimore City government. These school systems have no taxing powers and must compete with other county or city agencies for funds to provide educational services. Local funds for education are made as appropriations for specific purposes; and to assure that these purposes are adhered to, separate funds must be maintained to account for the monies. Maryland recognizes 6 funds in addition to a special account for keeping track of fixed asset. Following are a list of the funds and a brief description of each:

(1) The Current Expense Fund contains all accounts for general, routine current operations. Maryland presently has 12 categories into which current expenses are reported - Administration, Instruction, Student Personnel Services, Health Services, Student Transportation, Operation of Plant, Maintenance of Plant, Fixed Charges, Food Services, Community Services, Special Education and Capital Outlay. Some of these categories are further divided into specific functions, but each of the categories requires some or all of the following object of expenditure details: salaries and wages, contracted services, supplies and materials, other charges, replacement and additional equipment, and outgoing transfers. Subobject details are required for specific accounts; and expenditures for the categories of Instruction, Special Education and Administration require details to isolate expenditures for particular services, e.g., business support services vs centralized support services, regular instruction vs expenditures for gifted and talented students, and itinerant special education services vs expenditures for resource rooms.

(2) All transactions relating to major school construction or remodeling are accounted for in the School Construction Fund. Expenditures are accounted for as follows: purchase of sites, site improvements, buildings and building additions, remodeling, additional equipment, and other construction expenditures. In Maryland, the State has the responsibility of funding school construction and local school systems may supplement these funds to provide facilities in excess of those which are State approved.

(3) The Debt Service Fund accounts for the systematic repayment of principal and interest on debt. Although Maryland LEAs do not have the authority to issue bonds for school construction, they may be responsible for handling repayment of debt.

(4) The Food Service Fund accounts for operations required to provide meals to students and staff in schools; i.e., operating kitchen equipment, preparing and serving food, cleaning and storing equipment, and delivery services.

(5) The Student Activities Fund is for the purpose of accounting for funds which are owned, operated, and managed by the student body under the guidance of the LEA staff, e.g., extracurricular activities, school stores, etc.

(6) The Trust Agency Fund accounts for assets held in trust by the LEA for some other agency.

## HIGHLIGHTS FOR FY 1981

Due to Maryland General Assembly legislation, federal legislation and accounting policy changes initiated by the MSDE and LEAs which impact annually upon the reporting requirements for the school systems, historical continuity in reporting becomes difficult. One such change became effective for the [illegible] fiscal year. Salaries and wages for supervisors of instruction and all other providers of services which enhance instructional programs for regular pupils were shifted from the category of Instruction and moved to the category of Administration. To assess the impact of such a reporting change on [illegible], these expenditures have been separately identified in Selected Financial Data, Part II, Table 2.

Expenditures for educating students with special needs were separated from expenditures for educating regular students in 1981 when Category 15, Special Education, was added. Therefore, when comparisons of expenditures for Instruction are made for years prior to 1981, [illegible] add Special Education expenditures to instructional expenditures. For the years [illegible] not only must Special Education be added, but the expenditures now reported in Administration and School Instructional Support also must be added.

Other minor reporting changes have occurred over the past several years. Briefly, two categories were eliminated and expenditures transferred to other areas, and one category was [illegible]. Expenditures for Student Body Activities are now Cocurricular Activities under Instruction, and Outgoing Transfers was made an object of expenditures to be reported in the appropriate category. The category of Food Services, under which expenditures of local dollars for the Food Service Supervisor and his/her staff are budgeted, now has only one object of expenditure - interfund transfers. All Food Service expenditures are reported in detail in the Food Service Fund and shown in Selected Financial Data, Part II, on Table 11. A new Special Education category became law in 1977; and as a result, beginning with the 1981 school year, expenditures for educating students with special needs were removed from other instructional costs as historically reported. Details of these costs were separately reported for the first time in FY 1981.

It should be noted that many of the financial details which the LEAs report are not regularly included as a part of our annual public information releases. If you have specific needs for information not contained with Selected Financial

Data, we would like to hear from you to determine if we can provide the specific information you desire. Please make your request in writing to Mrs. Kathie [illegible], Specialist in Financial Reporting. If you would prefer to come in and see what information is collected routinely, or if you have questions regarding this information, please contact Mrs. [illegible] at 659-2664.

## DEFINITIONS

Administration refers to an expenditure category for reporting the general regulation, direction, and control of the LEA and the LEA instructional program. Activities in this category affect the LEA as a whole, not the administration of a single building or narrow phase of school activities. It generally refers to LEA officials in effecting the formulation and execution of educational or financial policy.

Assessed Valuation refers to the valuation of property as determined by the appropriate local government body for taxation purposes.

Average Daily Attendance is computed by dividing the sum of the days present of all pupils in the school system by the total number of days that schools are in session in a given fiscal year. When days per pupil are added in ADA, kindergarten pupils who attend [illegible] one-half day are counted as one-half present. ADA is reported in relation to an entire LEA.

Average Daily Membership is computed by dividing the sum of the days present and absent of all pupils in the LEA by the total number of days that the schools were in session. When days per pupil are added in ADM, kindergarten pupils are counted one-half when they attend school for only one-half day.

Budget is the plan of the LEA that [illegible] the [illegible] operating costs.

Capital Outlay is an expenditure which results in the acquisition of fixed assets or additions to fixed assets.

Community Services are services other than those for public school pupils, which are provided by the school or LEA for the community as a whole, or some segment of the community; e.g., community recreation programs, civic activities, public libraries, programs of custody and care of children, etc.

Debt Service refers to expenditures for the retirement of debt and expenditures for interest on debt, except principal and interest on current loans.

Federal Funds are funds received from the Federal government either directly or indirectly (as is the case with those funds which are given to the Maryland State Department of Education and distributed to the LEAs by any of several methods).

Fixed Assets are land, buildings, machinery, furniture, and other equipment which the LEA intends to hold or continue in use over an extended period.

Food Services are activities involved with the Food Service program of the school or LEA, including the preparation and serving of regular and incidental meals, lunches or snacks in connection with school activities, and the delivery of food.

Fund is an independent accounting entity with its own assets, liabilities and fund balances generally established as an account for financing specific activities of an agency's operations.

Health Services are physical and mental health activities which provide pupils with appropriate medical, dental, and nurse services.

Instruction refers to activities dealing directly with the teaching of regular pupils either in the school classrooms or in any other location; or it involves other learning situations such as cocurricular activities. Included are expenditures for the Office of the Principal.

Local Appropriation is money received out of funds set aside by the County Commissioners or City Council for a special purpose such as education.

Local Education Agency (LEA) is the local administrative unit which exists primarily to operate schools. In Maryland, the LEA coincides with the political subdivision, i.e., the 23 counties and Baltimore City.

Maintenance of Plant refers to activities which are concerned with keeping the grounds, buildings and equipment at their original condition of completeness or efficiency either through repairs or by replacement of property.

Nonrevenue refers to amounts received which either incur a future obligation or change the form of an asset from real and personal property to cash, thereby decreasing the net amount and value of real and personal fixed property.

Operation of Plant consists of keeping the physical plant open and ready for use, including cleaning, disinfecting, heating, moving furniture, caring for grounds, operating telephone switchboards, and other activities which are repeated regularly.

Revenue means an addition to an asset which does not increase any liability, does not represent the recovery of an expenditure, does not represent the cancellation or decrease in assets, and does not represent contributions of fund capital in Food Service and Student Body Activity funds.

Special Education consists of activities designed to serve students who, through appropriate assessment, have been determined to have temporary or long-term special education needs arising from cognitive, emotional, and/or physical factors.

Student Personnel Services are activities such as attendance services, social work services or student accounting services which are designed to improve the students' attendance at school and prevent or solve student problems in the home, the school or in the community.

Student Transportation consists of activities involved in the conveyance of pupils to and from school activities as provided by State law, including trips between home and school, or trips to school activities.

# PREFACE

Federal Program Expenditures is prepared annually from information contained in the Annual Financial Reports submitted by the 24 local education agencies (LEAs) in Maryland. These reports provide detailed information about the receipt and use of funds for the period of July 1 through June 30 of each year. The costs for each program reflect not only the federal funding portion of the program but also any matching or local support dollars required as a condition of the grant.

The charts in this report are for comparative purposes only. The average number of pupils belonging (ANB) is an average of the net enrollment record for the year, with kindergarten pupils counted as one-half pupil when in attendance for only one-half day. Since the federal programs are designated for use by specific target populations all of the students are not benefitting from the additional funds. An exception is in the case of Impact Aid. This money is given to school districts under formula based on the number of eligible students, but the money may be used for any purpose by the district.
